SOFTWARE DEVELOPER

I am an ambitious and creative Software Developer driven to disrupt and challenge how and where technology is used. The medium of technology allows me to channel my logic and reason oriented way of thinking about solutions while also allowing me to be equally expressive as an artist.

PROJECTS

- **Game of War** - A command line interface game built recursively in vanilla JavaScript.
- **Marvel Informatic** - Built a RESTful API with Express and Mongoose and fetched in a tab-based front end.
- **The Inner Bod** - A website built in react and utilizing restful api's that helps the user make healthy choices.
- **Hater** - A social media site modeled playfully as the "evil twin" of Twitter. Built in React, Django and PostgreSQL.

PROFESSIONAL EXPERIENCE

General Assembly | New York, NY

Software Engineering Fellow   **2020-2021**

- Participated in 12 weeks of rigorous project based learning becoming proficient with the most in demand tech stacks used in software development.
- Worked on several fully deployed solo projects and teams using the MERN stack and Django.

Self-Employed | Los Angeles, CA

Stock Trader   **2020-2021**

- Learned how to read technical charts and research companies in order to generate revenue on a personal managed trading account.
- Developed and structured trading plans as well as strategies to improve consistency.

Southern California Edison | Los Angeles, CA

Data Analyst   **2019-2020**

Hired as a contractor for Southern California Edison to help produce reports on energy consumption from their meter readers for schools, businesses, etc. to meet compliance on energy usage via data extraction.

- Monitored automated ETL (extraction, transformation and loading) jobs for failures, or errors resolving them myself or escalating as necessary through our ticketing system.
- Ran SQL code to retrieve and load data to produce reports and logs.

EDUCATION

Bachelor of Technology, magna cum laude, Computer Systems,

CUNY New York City College of Technology | Brooklyn, NY

TECHNICAL SKILLS

-JavaScript   -Python   -HTML   -CSS   -Git   -MongoDB   -ReactJS   -PostgreSQL   -Heroku Deployment

-Netlify Deployment   -MERN   -JAVA   -Node   -Express   -Mongoose   -RESTful API   -Django

SOFT SKILLS

- RESEARCH   - ADAPTABILITY   - SELF-MANAGEMENT   - PLANNING   - ANALYSIS   - CREATIVITY
